SUMMARY

Solutions-oriented and qualified Full-Stack Web Developer with 6+ years of experience in both front-end and back-end development processes. Proven record of developing and maintaining a multi-user platform, implementing automated systems, and managing databases and servers. Experienced in building robust e-commerce websites, including payment gateways integration, inventory management systems, and secure user authentication mechanisms. Skilled at integrating third-party APIs and designing responsive web applications.

EMPLOYMENT

Full stack Developer
Dentca | February 2019 – March 2024

- Developed and maintained core features, including e-commerce functionalities, in Angular, Ruby on Rails, and PostgreSQL for a platform serving 100,000+ users.
- Designed, developed, and implemented server-side logic for the web, resulting in a 20% faster app response time.
- Designed and developed a user-friendly interactive walkthrough, resulting in a 40% increase in product adoption.
- Supported in the development of web applications, improving site speed by implementing caching mechanisms.
- Optimized applications, tuning over 500 database queries leading to a 25% boost in overall application performance.
- Played a key role in developing an analytics dashboard, boosting customer engagement by 20%.
- Collaborated with designers to translate mockups and wireframes into responsive UIs.
- Implemented automated testing with Selenium, which contributed to a reduction of 50% in post-release bugs.

Frontend Developer
Chingu | Aug 2017 – Oct 2018

- Responsible for data sales visualization reports, increasing team productivity by 50%.
- Revamped outdated user interface using ReactJS, resulting in a user satisfaction increase of 30%
- Translated UI/UX design wireframes into code, producing high-quality markups and reusable components.
- Collaborated seamlessly with the back-end developers, integrating REST API that improved app usability by 15%.
- Participated in daily stand-ups and code reviews, enhancing team collaboration and code quality.
- Built and tested application functionality to ensure a desirable user experience across all platforms.
